Extreme Outdoor 4 Corners

Age Range: All ages

Supplies: 4 Cones

Set Up: Label the cones 1-4 to designate the 4 corners. Place the cones in 4 corners of the playing area.

Instructions: Select one person to be in the middle. When they finish counting, they point to a corner then open their eyes. Anyone who was in that corner must run to an opposite corner. The person in the middle tries to tag them before they get there. Anyone tagged before they reach an opposite corner joins the Counter in the middle for the following rounds. These players don't have to close their eyes or count (but they are not allowed to give hints to the person who is counting). In the next round, anyone who is in the middle can also try to tag the people running to the opposite corner. Make sure the taggers start off in the middle each round, but after the Counter has chosen a corner, they can leave the circle to tag the runners.
