

Outdoor Activities

Gator Tag

Age Range: All Ages

Supplies: A soft ball, cones

Set Up: Set up the cones in a large square.

Instructions: Have one child start with the ball (the ball will be the Gator for this game). When the child throws the ball in the air, and yells Gator, the game is on. Children can go anywhere within the coned area. The child with the ball is now trying to throw the ball at students to get them to join their team. If the gator touches any child, that child must freeze where they are hit. This child is now part of the swamp and can help throw the gator at other students to get them to join the gator team. The more children that get hit, the more can work together by throwing the gator around to get children that are still in the game. At any point, nobody may run with the gator in their hands (they can only run to retrieve the ball, then must freeze to throw it). All throwing of the gator must be done while the throwers are frozen. The game continues until there is one person left that is not part of the gator team.
